ABSTRACT

After reading the story "Dear Mr. Henshaw" by Beverly Cleary, students build an alarm system for something in the classroom as the main character, Leigh, does to protect his lunchbox from thieves. Students learn about alarms and use their creativity to create an alarm system to protect their lockers, desk, or classroom door. This activity uses a time frame of 40 minutes. (Author/SOE)

Reproductions supplied by EDRS are the best that can be made
from the original document.

ED 480 668

Activity: **Make an Alarm! (Can be used in conjunction with "Dear Mr. Henshaw")**

GRADE LEVELS: 3-5

SUMMARY:

After reading the story "Dear Mr. Henshaw" by Beverly Cleary, students will build an alarm system for something in the classroom, as the main character Leigh does to protect his lunchbox from thieves. Students will learn about alarms and use their creativity to create an alarm system to protect their lockers, desk, or classroom door. Note: this activity can also be done without reading "Dear Mr. Henshaw".

LEVEL OF DIFFICULTY [1 = Least Difficult : 5 = Most Difficult]

5-most difficult (can be modified)

TIME REQUIRED

40 minutes (one class period)

COST

$10 (approximately $1 per group, use materials already found in classroom)

STANDARDS:

1.1 Identify materials used to accomplish a design task based on a specific property, i.e. weight, strength, hardness, and flexibility.

2.1 Identify a problem that reflects the need for shelter, storage, or convenience.

2.2 Describe different ways in which a problem can be represented, e.g., sketches, diagrams, graphic organizers, and lists.

2.3 Identify relevant design features (e.g., size, shape, weight) for building a prototype of a solution to a given problem.

WHAT WILL THE STUDENTS LEARN?

The importance of alarm systems and where they are found.

How to work in teams, with members having different roles.

Design techniques and construction methods.

Understanding the importance of cause and effect when designing an alarm

BACKGROUND INFORMATION:

Design: to plan and make something in a skillful way

An alarm is a device that warns or signals, as by a bell, buzzer, or whistle. They work by having some type of unwanted action set them off. There are many different types of alarms. Some examples are: fire alarms, car alarms, alarm clocks, and security alarms.

RESOURCES:

http://howstuffworks.lycos.com/inside-clock.htm -Good step-by-step pictures of a wind-up alarm clock. Shows inner workings of clock including gears

http://www.zetnet.co.uk/sea.jnp/earth.4/time.htm - Ancient Greeks introduced alarm clocks using water

http://www.ernie.cummings.net/clock.htm?BUTTON=Return+to+Clock+Menu#MENU - General History of clocks, including early candle alarm clock

http://www.howstuffworks.com/digital-clock.htm - How a Digital clock works

MATERIALS:

Small bells (inexpensive)

String

Elastics

Balloons

Wires

Marbles

Papertowel tubes

Copyright © 2001
All Rights Reserved

Pipe cleaners

Popsicle sticks

Paper cups

Duct tape

Typical classroom supplies (such as paper clips, paper, tape, glue, erasers, scissors, etc.)

PREPARATION:

Teacher should gather materials to be used by students to build the alarms.

DIRECTIONS:

1. Introduce the topic of alarms to the students. Discuss the use of alarms in our daily lives and where they are found. If using the book, "Dear Mr. Henshaw," discuss why Leigh built an alarm.

2. Explain to the students their goal. They must build an alarm system to protect something in the classroom using only the materials that the teacher gives them. Some ideas are to build alarms to protect the students' lockers, desks, backpacks, the classroom door, and a window.

3. Identify the materials available to the students. Discuss any safety concerns that should be considered with these materials being used. Explain that the alarm system must consist of at least three steps, and should use the least amount of materials as possible. Talk about and explain what a design is and why it is important, explain your criteria for the grading of their designs. NOTE: the teacher may want to begin with a one step alarm, and make it more challenging by adding steps.

4. Break the students up into groups of 3 or 4. They should collaboratively accomplish the task of building an alarm.

5. Students should draw the design of their alarm system on paper. There should be an explanation describing what their alarm does, how it works, and what materials were used.

Copyright © 2001
All Rights Reserved

6. Each group should present their final products to the class and explain how it works.

INVESTIGATING QUESTIONS:

What are alarms used for?

Why do we need alarms?

Where do we find alarms?

Why did Leigh in "Dear Mr. Henshaw" need an alarm?

What do most alarms have in common?

What might you need an alarm for in the classroom?

Rubric for Performance Assessment						
Activity Title:	MAKE AN ALARM!			Grade Level:		
	1	2	3	4		
Criteria	Beginning	Developing	Proficient	Advanced	(X factor)	Subtotal
DESIGN OF ALARM SYSTEM	Design of alarm system is difficult to read and is not expected to work successfully.	Design of alarm system is not very clear.	Design of alarm system is clear and well thought out.	Design of alarm system is highly developed, very descriptive, and goes beyond expectations.		
TEAMWORK	Only one of the team members designed and constructed the alarm system.	Most of the team members worked together on the design and construction.	All members of the team participated in design and construction.	All members of the team participated in design and construction and presentation and worked well together.		
PERFORMANCE	Alarm system consists of less than three steps and does not work.	Alarm system consists of less than three steps, but works.	The three steps of the alarm system work successfully.	Alarm system consists of more than three steps and works well.

Activity Evaluation Form

Activity Name: _____

Grade Level the Activity was implemented at:_____

Was this Activity effective at this grade level (if so, why, and if not, why not)?

What were the Activity's strong points?

What were its weak points?

Was the suggested Time Required sufficient (if not, which aspects of the Activity took shorter or longer than expected)?

Was the supposed Cost accurate (if not, what were some factors that contributed to either lower or higher costs)?

Do you think that the Activity sufficiently represented the listed MA Framework Standards (if not, do you have suggestions that might improve the Activity's relevance)?

Was the suggested Preparation sufficient in raising the students' initial familiarity with the Activity's topic (if not, do you have suggestions of steps that might be added here)?

If there were any attached Rubrics or Worksheets, were they effective (if not, do you have suggestions for their improvement)?

II. REPRODUCTION RELEASE:

In order to disseminate as widely as possible timely and significant materials of interest to the educational community, documents announced in the monthly abstract journal of the ERIC system, Resources in Education (RIE), are usually made available to users in microfiche, reproduced paper copy, and electronic media, and sold through the ERIC Document Reproduction Service (EDRS). Credit is given to the source of each document, and, if reproduction release is granted, one of the following notices is affixed to the document.
If permission is granted to reproduce and disseminate the identified document, please CHECK ONE of the following three options and sign in the indicated space following.

☒ Check here for Level 1 release, permitting reproduction and dissemination in microfiche or other ERIC archival media (e.g. electronic) and paper copy.

☐ Check here for Level 2A release, permitting reproduction and dissemination in microfiche and in electronic media for ERIC archival collection subscribers only.

☐ Check here for Level 2B release, permitting reproduction and dissemination in ERIC archival collection microfiche only.

Documents will be processed as indicated provided reproduction quality permits. If permission to reproduce is granted, but no box is checked, documents will be processed at Level 1.
I hereby grant to the Educational Resources Information Center (ERIC) nonexclusive permission to reproduce and disseminate this document as indicated above. Reproduction from the ERIC microfiche, or electronic media by persons other than ERIC employees and its system contractors requires permission from the copyright holder. Exception is made for non-profit reproduction by libraries and other service agencies to satisfy information needs of educators in response to discrete inquiries.

III. DOCUMENT AVAILABILITY INFORMATION (FROM NON-ERIC SOURCE):

If permission to reproduce is not granted to ERIC, or, if you wish ERIC to cite the availability of the document from another source, please provide the following information regarding the availability of the document. (ERIC will not announce a document unless it is publicly available, and a dependable source can be specified. Contributors should also be aware that ERIC selection criteria are significantly more stringent for documents that cannot be made available through EDRS.)
